NTSAKO MASHELE

PROG6212 PART 1

API ENDPOINT PLAN

A RESTful API will be used by the RaceDay system to enable communication between the web application and the system. Authentication, user profiles, events, categories, enrolments and outcomes form the endpoints. The logged-in user's status as an Organiser or Participant will determine their access to protected endpoints.

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
POST	/api/auth/register	Registers a new RaceDay user.	Public	First name, last name, email, password and role.	201 Created – account created; 400 Bad Request – invalid data; 409 Conflict – email already exists.
